War Inspires New Machines

British Engineers Quick to Learn Lessons of the War in Progress.

LONDON.—Aside from the new implements mechanized war has brought into being, new methods of instruction have been developed for their use. One of these schools in Britain is engineering with new placement, fortifications and bridge building. The campaign in the western desert is responsible for the first two, lessons learned from the Don and Donetz for the third.

The military expert of the Times of London, at an engineering school with the "Northern Command," writes of some things he observed, beginning with a military bridge:

"It can be constructed more quickly and simply than any comparable bridge known to be used by the Germans.

"It is a bold claim, but it is supported by the highest technical authorities. Nor need it be doubted that, on whatever front he may have to construct such a bridge, the sapper will combine the finest fighting qualities with all his engineering skill.

Easy to Assemble.

"This new type of service bridge is particularly impressive for its simplicity of design. Its various sections and component parts can be moved easily and rapidly under normal training conditions. That is not to say that the work is light, but it does mean that it can be done quickly and without strain by the men whose job it is. It may be taken that the sections of framework, girders and so on are designed to a carefully studied optimum length and, besides this, the method of fitting sections together has the same quality of simplicity. The bridge is, by reason of its sectional construction, capable of use as a pontoon bridge.

"An inexpert observer might be most impressed with this development in bridge construction by comparing the new type with the Inglis bridge. In the latter the gantry method and the network of girders seem extraordinarily slow and elaborate. But the Inglis bridge has had an honored place in the history of military engineering, and its day is not yet over. It is admittedly slower in construction than the latest type of service bridge, but will still be used in rear areas.

"A demonstration of earth-moving machinery at the school brought into action a giant bulldozer that enabled one man to move earth on a really large scale.

Water Purification Set.

"Among lighter equipment there was a reminder of how the armies in Libya depend on the royal engineers for their vitally important supplies of water. There was, for instance, a mobile water purification set, for filtering and sterilizing, providing drinking water in bulk, and having a capacity of 2,000 gallons an hour.

"At the other end of the scale there was the portable hand-operated set, weighing only 140 pounds, with a capacity of 100 gallons (or 400 water bottles) an hour. Again, there were machinery lorries for use as field machine shops, and compressor trucks which carry, and produce power for pneumatic tools.

"It might have been forgotten momentarily that all this machinery and equipment, so essential to the maintenance of an army, is right in the battlefield under conditions of war today.

"But the school recalled the fighting skill of the royal engineers by staging an assault river crossing. Here the most recent types of folding boats, raft ferries and kapok floats were put into use for transporting men and guns and machines.

Homemade Bicycle Pump Nears 'Perpetual Motion'

PONCA CITY, OKLA.—C. Hank, who deals in ice cream and candy, has rigged a device on his bicycle that pumps air into a tank; blows a warning whistle; applies an air brake to the rear wheel and enables him to pump up his own tires without resorting to a hand pump or a filling station. He says he believes the size of it can be increased so that the air will provide the motive power to operate the bike. Perpetual motion stuff!

Skunks Now Dangerous From Two Standpoints

NAPA, CALIF.—Skunks are dangerous from both ends, Kenneth Spraggins, three-year-old son of Mr. and Mrs. D. H. Spraggins, discovered. He was bitten by one, which, upon examination, proved to have rabies. Speedy Pasteur treatment is believed to have saved the child.

British Tars Do Their Christmas Buying Early

ALEXANDRIA.—Officers and sailors of the Mediterranean fleet are doing their Christmas shopping early this year.

There is a big demand for women's hosiery and candies. Navy men say these are hard to get in England. Stores are so confident packages will arrive at destinations that they are guaranteeing to refund money if the packages are undelivered.

Missionary Finds Japan Is Worried

Fears Vast Resources and Manpower of U. S.

CHICAGO.—After almost half a century as a missionary in Japan and China, a span that came to a climax when he was taken prisoner by the Japanese following the Pearl Harbor attack, Alexander Paul, secretary of the United Christian Missionary society, arrived in Chicago and asserted that the Japanese feel that if the war is continued much longer they will lose it.

"I have yet to meet a Japanese who thinks his side can win this war if it continues much longer—but just the same he will shed his last drop of blood for his country," said the 68-year-old missionary.

The Japanese are afraid of America's vast resources, her fresh and unlimited manpower, her manufacturing facilities and her inventive abilities, said Paul.

"And not only that, but the Japanese know that Russia will attack them if Hitler shows signs of weakening," continued the visitor. "And so, despite victories being won now, the Japanese know they cannot hold these victories if the war continues for the next few years."

When Pearl Harbor was attacked, Paul was occupying a room on the top floor of a Christian school just outside Nanking.

"I was held a prisoner in that room for about six weeks. Then I became ill. It was then arranged for me to be taken to an American's house in Nanking where more comfortable quarters would be found.

"But this house was under guard. We were in technical custody there for many months and could not leave the grounds. Finally I received word that I could return to America in the Gripsholm and in a short time I was placed aboard that ship."

Heart Disease Deaths Doubled Over 40 Years

WASHINGTON.—The census bureau reported that the death rate in this country from heart disease has more than doubled in the last 40 years, although the rate of deaths among persons less than 25 years of age attributable to heart disease fell off during that period.

Deaths from heart disease in 1940 totaled 385,191, a rate of 292.5 a 100,000 population. This was the greatest number of deaths ever recorded from heart disease and an increase from 275.5 a 100,000 death rate for 1939.

Comparisons between 1900 and 1940 showed the following decreases in heart-disease death rates in low age brackets: Under one year, from 147.8 a 100,000 population to 17.5; one to four years, from 15.0 to 3.6; five to fourteen years, 2.3 to 8.0; fifteen to twenty-five years, from 28.8 to 14.0; twenty-five to thirty-four years, from 43.4 to 29.7.

In the upper age groups, the rate of heart disease fatalities has increased as follows: Thirty-five to forty-four years, from 80.8 to 91.7; forty-five to fifty-four years, from 173.0 to 279.5; fifty-five to sixty-four years, from 414.1 to 713.5; sixty-five to seventy-four years, from 807.3 to 1,723.5; seventy-five and over, from 1,819.7 to 4,813.2.

King's Nephew, 18, Works In British Arms Plant

LONDON.—The Honorable Gerald Lascelles, nephew of King George VI, has been working since last April in a munitions plant in the northeast of England, it was learned recently.

The lad, who will be 18 years old soon, is the son of the earl of Harewood and the Princess Royal. He took a job as an apprentice under an assumed name and has been working from 7:45 a. m. to 6:45 p. m. steadily. It was explained that he was anxious to do something in the war before he can enter the army.

His brother, Lord Lascelles, is in the Grenadier Guards. His father served throughout World War I.

Fined $50 for a 2-Cent Toothpaste Overcharge

BALTIMORE. — A retailer was fined $50 and costs for a two-cent overcharge on a tube of toothpaste in what court officials believed was the first conviction in the nation under the triple damage clause of the Price Control act.

The suit was brought under the section of the price act entitling an overcharged plaintiff to triple the cost of the purchase or $50 and costs, whichever is greater.

The plaintiff said he bought a tube of toothpaste for 23 cents in March. In July, he testified, the same store charged two cents more for a similar-sized tube of the same brand.

Considerable Walking Done by Air Corps Men

KNOLLWOOD FIELD, N. C.—Drill instructors at replacement training centers of the army air forces technical training command walk an average of 120 miles between Monday reveille and Saturday retreat. The figure reported to AAFTTC headquarters here is based on tests recently made with a pedometer at the Miami Beach technical training schools, where everyone is busy as the instructors.

Fruit Sprayers Battle Fires

Farmers Give Army Pointers On New Method of Fighting Flames.

LANSING, MICH.—Farmers who sought to protect their own property from fire by keeping high-powered fruit sprayers filled with water made a contribution to the science of fire fighting and to the war effort, according to officials of the John Bean Manufacturing company.

Salesmen found that farmers used their high-pressure fruit sprayers on orchards in summer and for fire-fighting equipment the rest of the year. The farmers reported the sprayers could launch "good-sized fires" and that they used much less water to put out fires than old-time pumps or the "bucket brigade."

The company experimented with higher pressures and larger equipment. The "fog drive" fire-fighting technique resulted and was adopted by the war department for its emergency aerial trucks. Meanwhile, the company developed its own "revolutionary" type of fire truck equipped with high-pressure pump, water tank, "garden-hose" hose and "fog" nozzles operated by a trigger similar to those on a boy's squirt gun.

Gets Government Orders.

Before commercial distribution of the new type of fire truck could begin, the government began ordering equipment for its own fire protection and an adaptation of the equipment for gas decontamination.

Company officials said it had been known for a long time that streams was the best fire fighting medium known. They explained that their high-pressure fog, which drifts onto a fire like smoke, could be called "cold steam."

Main advantage of the new method was said to be water economy and incidentally reduction or elimination of water and chemical damage caused by other methods. Officials said that but one-tenth to one-twenty-fifth of the water ordinarily required to put out a fire was used with the "fog" method.

Howard C. Lisle, general manager of the Bean plant, said the "fog-drive" method had proved its value at fires which occurred at a distance from fire hydrants and especially at airports where, when a crash occurs, there is no time for laying a line of hose.

Demonstrate on Shack.

At a recent demonstration here, a 20 by 16 foot shack, 12 feet high, was saturated with gasoline and oil. Fire was allowed to envelop it before the "fog" was turned on. The fire was "blacked down" in one minute and was put out under two minutes with less than 100 gallons of water.

Arnold C. Renner, Michigan state fire marshal, said the "fog" method if handled by experts would be effective in fighting 75 out of every 100 fires.

"But when the flames begin to roll and the wood is charred down an inch or more, the old method where you hit it with a lot of water still goes," Renner said.

Japanese Said to Build Bamboo Isles for Planes

CHUNGKING, CHINA.—A military spokesman said recently that the Japanese were using huge "floating islands" made of bamboo as airplane bases in the Pacific ocean.

He said that Chinese intelligence agents discovered large-scale employment by the Japanese of such islands as bases, refueling and rest stations for the Japanese air force.

The islands, he said, are modern, streamlined rafts big enough to serve as airfields. He said Chinese headquarters had obtained photographs of them and that "thus far the Allies seem not to have discovered the new Japanese invention."

Clean Platter Earns Stamps in This Cafe

SAN FRANCISCO.—Lick the platter clean in George Mardikian's restaurants and you'll get a 10 per cent refund on your dinner bill—in war stamps. Mardikian, asserting 25 to 50 per cent of the food ordered at a cafe was wasted, said he was making the offer "to defer the day of food rationing."

Mass-Produced Rocket to Aid Torpedoed Seamen

LONDON.—A new firework now being mass-produced will help to save the lives of shipwrecked seamen. The firework is a rocket which goes 200 feet high, shoots out five stars and can be seen from a distance of 10 miles. Carried in a watertight case, the rocket is ignited by a cigarette-lighter device contained in the cap.

Britons Ordered to Wear Shorter Socks

LONDON.—The latest device for winning the war will be a strong draft on the shins this winter. The board of trade, which has been dictating clothing restrictions, has ruled that men will have to wear ankle-length socks nine inches long. The new model will be called "austerity" socks.

Christmas Music at Liberty

SPECIAL CHRISTMAS SERVICE FOR THE LIBERTY BAPT. CHURCH

On Sunday at 11 A. M., the choir of Liberty Baptist Church will render a program of Christmas music.

The pastor will speak on "Great Joy."

The musical program follows:

Organ Prelude, O Holy Night,—Miss Cornelia Gills

Choir Processional, Angels From the Realms of Glory

Anthem, The Angels Song, Jonh Curtis Caldwell and choir

Hymn, It Came Upon the Midnight Clear

Organ, Piano Duo: Christmas Medley, Miss Cornelia Gills and Miss Harriett Holley

Anthem, There Is Room In My Heart For Thee

Hymn, Hark, The Herald Angels Sing.

Postlude, Selected, Organ and Piano.

In the evening at 7:30, "White Christmas will be observed and the Junior Choir will present a candle light service.

FOR SALE—Dining room table, Queen Anne, 8 feet 8 inches long. See

Mrs. C. S. McDearmon

The Fidelis Sunday School Class will have its annual Christmas party Sunday, Dec. 20. All members are urged to come and bring a stuff gift with them.

GARDEN CLUB SPONSORS CANTEEN FOR APPOMATTOX

The Garden Club of Appomattox has decided to institute a canteen service in Appomattox for the benefit of the boys in Service. This service will start in a small way, having as its first project the serving of sandwiches and a hot drink to the boys from Appomattox as they leave for induction. The first group to benefit from the canteen service will be the 24 boys leaving here on December 18.

Only 6 shopping days are left before Christmas.

Our power may be the deciding factor in North Africa fighting.

What You Buy With
WAR BONDS

Uncle Sam's lighter 37-millimeter **anti-tank guns** are dubbed "tank killers." They are attached to the infantry, not the field artillery, and cost approximately **$6,500 each.** They have proved particularly effective in anti-tank warfare.

They are mobile, mounted on automobile tires and can be rapidly whisked from place to place. Your purchase of **War Bonds** will help pay the cost of these field pieces so necessary for our Army in this War. Join the **Payroll Savings Plan** at your office or factory and let's **"Top that ten percent"** by investing at **least ten percent** of your income in War Bonds.

U. S. Treasury Department

He Swung Too Hard, Landed in Hospital

BINGHAMPTON, N. Y.—Golf may be a body-builder, but Nathan W. Hankin is skeptical.

Hankin took a tremendous swing at the ball on a local course. The result: torn ligaments in his leg and several dislocated cartilages. The doctor said Hankin would hobble on crutches for six weeks.

The Yokums say—

Holy Smokes! We gotter git some cash someware's so we kin put 10% into War Bonds. Everybody's got ter do that by New Y'ar's.

What You Buy With
WAR BONDS

Our military forces must depend upon aerial photographs for an accurate mapping of enemy territory. Thus aerial camera is a vital necessity for our scout observation planes. These cameras cost up to **$8,000 each** and will make excellent pictures from tremendous heights.

A poor map may mean the difference between **victory** and **defeat.** So help your boys towards **victory** with your purchase of **War Bonds.** Join the Payroll Savings Plan at your office or factory. **Let's "Top that ten percent."**

MORE PELT HANDLING HINTS FOR TRAPPERS

After the experienced trapper has washed the fur and slit up the backs of animal's hind legs to base of the tail, he follows these steps:

For "cased" pelts, hang carcass by hind feet, and peel skin downward from body, like pulling off a sock. (Diagram 1.) Work right along with a good sharp knife to remove pelt, keeping pelt as free of flesh and fat as possible while skinning; Be careful around nose, ears and eyes.

After skinning (Diagram 2), slip the "cased" pelt loosely over the scraping board, *fur-side-in;* and with a dull edge, such as an old knife or a sharpened lath —scrape skin from head to tail. Remove all surplus fat and flesh, but don't scrape too close. Shift the pelt around on the scraping board. In that way, you will never be scraping along edge of board.

Diagram 3 shows the beginning of "open" handling. *(Beaver, Raccoon or Badger pelts.)* Slit pelt down center of belly from mouth to tail; also, down back of hind legs and inside front legs. Never cut off heads, or slit up back.

Stretch "open" pelts by tacking them on a wall or board with fur side toward the board, exposing the flesh side to the air. (Diagram 4.)

These are the only trousers in the place with cuffs.

POWERS — SEARS

Mattie Irby Sears Is Married To Major Eames Ashby Powers

The wedding of Miss Mattie Irby Sears, daughter of Mrs. J. E. Sears and the late Mr. Sears of Appomattox, and Major Eames Ashby Powers, United States Army, Bermuda, son of Mr. and Mrs. Calvin Burton Powers, of Greensboro, Alabama, took place at Memorial Methodist Church, Saturday December 12, at 9 P. M. The Rev. W. K. Cunningham, of Woodstock, Va., former pastor of the bride officiated, assisted by the Rev. W. R. Reed, her present pastor. Before the ceremony Mr. Reggie Stiles, of Richmond, Va., rendered piano solos, "Believe Me If All Those Endearing Young Charms," "I Love You Truly," and other selections. Mr. John Curtis Caldwell sang "Oh Promise Me" and "Because." Mrs. W. B. Caldwell accompanied her son at the piano, later playing the processional and recessional as the bride's mother's wedding. The church was decorated with palms, smilax and white gladioli and lighted with Cathedral candles.

The bride was attired in her mother's wedding gown of white charmeuse trimmed with real lace and brilliant seed pearls. She wore a bracelet of gold and pearls which was worn by her great grand-mother at her wedding, and a pearl crescent which was a wedding present of her father to her mother. She carried a shower bouquet of white roses and lilacs. The bride was given in marriage by her mother, who was attired in black crepe with a shoulder corsage of white roses.

The groom had as his best man Colonel J. E. Bush, United States Army, Fort Bragg, N. C.

Miss Dorothy Sears, of South Boston, and Mrs. Ivey Holland, of Appomattox, sisters of the bride, were the maid and matron of honor. They were attired in pink and green dresses also worn in their mother's wedding. They carried arm bouquets of roses and gladioli. Little John Ivey Holland, nephew of the bride, was the ring-bearer.

The ushers were: Corporal R. L. Burke, Jr., Camp Lee, Va., Lt. Richard McDearmon, of Camp Butner, N. C.; Mr. Robert Allen Sears, of V. P. I., Blacksburg, brother of the bride, and Mr. Ivey Holland, of Appomattox.

The groom's mother was attired in a dress of black lace and chiffon and wore a shoulder corsage of gardenias.

The bride is a graduate of the Appomattox high school and attended Lynchburg College and the Richmond Professional Institute and at the present time she is with the Woman's Army Auxiliary Corps, Richmond, Va.

The groom is a graduate of Greensboro high school and the University of Alabama. He is now a member of the staff of Bermuda Base Command, U. S. Army, Bermuda. He has been in foreign duty for a period of nearly two years and has been with the War Department since 1933.

A reception was held at the home of the bride. The out-of-town guests were: Colonel and Mrs. J. E. Bush of Fort Bragg, N. C.; Mr. and Mrs. Calvin B. Powers, of Greensboro, Alabama; Mr and Mrs. L. E. Blodworth, Miss Virginia Whitehurst, Messrs. Reggie and Ronnie Stiles, Richmond; Mrs. Elizabeth McDearmon, of Richmond; Rev. and Mrs. W. K. Cunningham, of Woodstock; Lt. Joachim McDearmon, of Camp Buckner, N. C.; Miss Edith O'Brien, of Lacassine, Robert Allen Sears, of V. P. I.; Mrs. Bettie Booth, of Lynchburg; Miss Josephine Jenkins of Charlottesville; R. F. Steele Sr. and R.F.B Steele Jr, of Petersburg; W. T. Steele, of Richmond and Miss Kate Franklin, of Pamplin. The bride and groom left immediately for a Southern wedding trip.

Miss Elizabeth McDearmon entertained the bridal party and a few out-of-town guests at a tea for Miss Sears on Saturday evening.

Mrs. Ivey Holland and Miss Dorothy Sears gave a buffet supper to the out-of-town guests on Saturday night, which were here to attend the wedding of Miss "Pat" Sears.

PUBLIC SALE OF VALUABLE TRACT OF IMPROVED LAND WITH GOOD BUILDINGS

Pursuant to the authority vested in me by virtue of a certain deed of trust dated the 14th day of December, 1939, signed by Charles W. Smith and Cecelia Smith, husband and wife and of record in the clerk's office of Appomattox County, Virginia, in deed book Number 89 at page 16, in which deed the said parties conveyed the hereinafter described property unto me, George Abbitt, Jr., trustee, on the terms and conditions therein set out and having been requested by the holder of the notes therein secured to sell the said land, I will offer for sale to the highest bidder at 10 o'clock A. M. on

SATURDAY JANUARY 19th, 1943 IN FRONT OF THE COURT HOUSE OF APPOMATTOX COUNTY, all of the following described real estate:

All of that certain tract or parcel of land lying and being in Stonewall district of Appomattox County, Virginia, about one and one-half miles North-East of Oakville Post Office, Virginia, lying on both sides of the Oakville -Wreck Island Creek Road, and adjoining the lands of Noah N. Coleman, R. J. Coleman, T. E. Owen and others, containing 239.95 acres and being the same tract of land that was conveyed to said Charles W. Smith and Cecelia Smith by deed dated the 14th day of October, 1939, from the children and heirs of Stephen Wooldridge, said deed to be recorded just ahead of this deed in the Clerk's Office of the Circuit Court of Appomattox County, Virginia, and a plat of survey made by W. A. Moses, Surv., dated on the 24th day of August, 1939, is recorded along with said deed, reference to both Deed and plat is hereby made for a better description of said land.

PLACE OF SALE: Front of Appomattox Court House

TIME: January 19th, 1943, at 10 A. M.

TERMS: CASH
